## EXAMINER'S STATEMENT FOR REASONS OF ALLOWANCE:

The present invention is directed to phone line termination circuits and isolation systems for use in selectively isolating electrical circuits from one another, wherein isolation systems comprises capacitor-coupled isolation barriers for phone line termination circuits. Claims 1-24 identify the uniquely distinct feature of the phone isolation system for separation of ring detection function across an isolation barrier wherein partitioning of the ringer circuitry across both sides of the isolation barrier has been accomplished. The closest prior art, Hershberger et al [US 5,564,984], Apfel [US 5,694,465], and Zanders [US 5,258,721] disclose a method and system for a data access arrangement for a telephone line interface wherein a high voltage isolation between the phone line side and the power side is accomplished. But they, either singularly or in combination, fail to anticipate or render the above limitation obvious.

The claims have been re-numbered as follows:

CLAIMS NUMBER (ORIGINAL)	CLAIMS NUMBER (FINAL)
1-9	1-9
15	10
10-14	11-15
16-24	16-24

Claim no. 1 along with figure number 17 will be published in the Official Gazette.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Allowance".
